

## Utility Buckets

Utility Buckets - "Slip on the forks" attachment buckets or Universal Fit buckets can be utilized along with whatever model or design of extendable reach lift truck. If your unit is unable to be matched with a quick-tach unit, another new or second-hand universal fit bucket could be located in its place. Standard universal forklift buckets connect to blades that are up to 6" wide and are 48" long. Bigger fork pockets could be ordered through an account executive upon request.

Because they slip directly onto the forks, universal fit buckets stay on the machinery and are much less vulnerable to destruction. Compared to the quick-tach bucket models, universal fit buckets are 50 percent. This extra space makes them ideal for carrying irregular shaped loads like for example backfilling behind walls, tearing off roof trash, elevating roof gravel, moving large debris piles and broken up concrete.

### Quick-Tach Buckets

Also, made as attachments meant for extendable-reach lift trucks, Quick-Tach buckets, are designed to tolerate the positioning of materials far beyond the standard reach of the loader. A hardened beveled cutting blade on both sides and on the leading edge reinforces strength, resistance to wear and tear and provides supreme durability. Quick-Tach lift truck buckets are reinforced by scuff bars along the base of the unit which protect it from scratches.

Quick-Tach lift buckets could in many situations substitute the forks and carriage of a lift truck, which may weigh anywhere between one hundred to seven hundred pounds. These buckets when installed could free up more load capacity, enabling it to deal with both larger and heavier items. The Quick-Tach is able to pour materials about 1.5 feet higher thanks to the shorter depth of its bucket. These buckets are fabricated in a customized fashion so as to meet all the specifications of particular models and makes of lift trucks. It is vital to consult a construction equipment specialist in order to find the modified Quick-Tach bucket solution for all your needs.

Lift truck bucket attachments are great for construction work on the ground level. They can be utilized to transport snow in the northern parts, gravel and even sand. Clean-up on the jobsite can be also be accomplished utilizing a forklift bucket. The numerous applications the bucket could accomplish saves the business much money and time as it does need to absolutely switch tools or equipment and this could help prevent running into overtime.
